Projects

Peer-to-Peer Shopping Service (E-commerce Platform) | *Major Project*

Ongoing

- Developing a community-driven delivery platform where individuals earn by bringing items from local shops to customers.
- Creating a decentralized shopping and logistics network to optimize local commerce.

Momentum - All-in-One Productivity Extension | *Major Project*

Ongoing

- Building a Chrome extension that tracks and visualizes user activity to promote focus and accountability.
- Features weekly and monthly performance analytics with interactive graphs and pie charts.
- Provides productivity insights to help users reduce distractions and improve learning efficiency.

Chat App | *Personal Project*

Completed

- Built a real-time messaging app with the MERN stack and Socket.io.
- Utilizes Zustand for state management and Axios for API communication.
- Implements Socket.io for live, instant updates.

CRUD Drive App | *Personal Project*

Completed

- Developed a Google Drive-style platform built with React, Node.js/Express, and MongoDB.
- Features REST API integration for high-performance backend operations.

Netflix Clone UI | *Personal Project*

Completed

- Developed a movie browsing app featuring a responsive UI.
- Implemented secure sign-ins using React and Firebase Authentication.

YouTube Clone | *Personal Project*

Completed

- Built a video streaming interface with React and the official YouTube API.

Experience

Freelance Web Developer

Remote

Self-Employed

- Designed a responsive website and promotional brochure for a local pizza startup, focusing on brand consistency and user-friendly design.
- optimized website performance and user experience, contributing to a **15% increase in customer engagement**.

Additional Information

Problem Solving: Solved 350+ algorithmic questions and 230+ LeetCode problems.

Languages: English (Fluent), Hindi (Fluent), Malayalam (Fluent), Tamil (Basic)
